

# BySky Residential VoIP Services

## BySky's Hosted Residential VoIP Services

**Simple, efficient, and saves you money...**

### What else do you want in a VoIP service?

BySky VoIP was designed with you in mind! The advances in internet technology have provided the means to eliminate your traditional 'Ma Bell' phone service and take advantage of 'Voice over Internet Protocol'. This means your voice, and the voice of others, uses the same transport method as browsing the web and checking your email. It's there, you have it - now you can take advantage of it even more!
